Here and There

A rich strike of silver lead ore has been made on Galema Hill, Yukon Territory. One vein is eighteen feet in width and shows 70 per cent lead with 30 to 50 ounces of silver. Several big mining interests are reported as active in this area.

The manufacture of wooden boxes is an important industry in British Columbia. There are 25 box-making plants in the province, representing a capital of between \$3,000,000 and \$4,000,000, about 1,200 employees and an annual payroll of not less than \$1,250,000.

So popular has the bungalow camp system established by the Canadian Pacific Railway become that it is necessary to extend it greatly. This statement was made recently by C. B. Foster, Passenger Traffic Manager, after a visit to the hotels and camps in the Rockies.

That the farmers of Western Canada are now giving increasing attention to the improvement of their home surroundings is shown by the fact that they have not only planted 5,250,000 trees distributed by the government forestry stations this year but have also purchased large quantities from private nurseries.

Summer fishing commenced on Lesser Slave Lake on May 29th and will close September 30th. Operators have been limited to a catch of 1,500,000 pounds of whitefish but no limit has been placed on pickerel and Jack fish, as the market for these varieties is restricted. Four fish companies are operating this summer and will ship to Chicago via Dominion Express.

Imports of Canadian produce and manufacture into Australia reached during the year ended June 30th, 1924, amounted in value to \$5,064,253, an expansion of \$1,899,802 over the previous year. It is the largest volume of trade yet recorded between Canada and Australia. The greatest increase was in motor chassis though a good volume of trade was also done in rubber goods, boots and shoes.

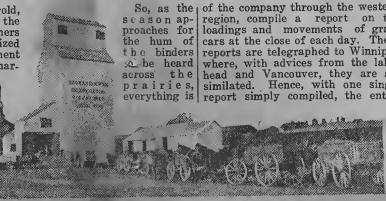

What is claimed to be a world's record for relaying rails was established by a crew of men on the Canadian Pacific Railway, in the New Brunswick district recently. In two days the 220 men in the gang tore up 22.7 miles of old 85-lb. rails and replaced them with new. All available data states that the former Canadian record was 11.7 miles, which exceeds that established in the United States.

The "Empress of Scotland," one of the Canadian Pacific Railway's finest liners, docked at Quebec on August 8th with a passenger list crowded with important names. Among them were Lord Beaverbrook, the Canadian financier, Edward W. Bok, editor of the Ladies' Home Journal, whose offer of a fifty thousand dollar prize for the best plan tending to maintain world peace created so much interest recently, and E. W. Beatty, K.C., Chairman and President, Canadian Pacific Railway. Mr. Beatty had just concluded a most successful tour of Europe with the object of attracting capital and immigrants to Canada. He spoke with great enthusiasm of the prospects of obtaining both and especially anticipated an influx of fine new Canadians from Denmark.

WESTERN CANADA'S RIVER OF WHEAT

A NEVER-ENDING stream of gold, flowing from the farms of the Prairie Provinces to the consumers of bread stuffs in all parts of the civilized world, is represented by the movement of the farmers' grain to the world markets. Beginning in August each year and in some years flowing constantly forward until August of the following year, this everlasting river of wheat is Western Canada's contribution to the feeding of the civilized world. In the movement of this crop from the country elevators and loading platforms of the Prairie Provinces, the Canadian National Railways year by year are playing a more important part.

Long before the western farmer has finished his seeding in the spring, preparations have been begun by the railways to move his crop. Cars must be ordered, for each year more equipment is needed for the movement of the grain; other cars, which have been in service, must be brought into the repair yards and overhauled or rebuilt according to their needs; for the movement of grain is a strenuous work and grain cars show the effects of a season's handling. And, since cars could not move forward without motive power, new locomotives of immense hauling power are necessary and must be ordered, while those which have already seen service in this strenuous work must also be

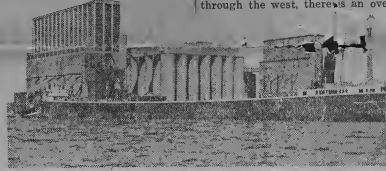

Farmers' Grain at Line Elevators

being prepared for the rush of the harvest work. Constant vigilance in this, as in every other great movement, is the price of safety and nothing is left undone to ensure that the movement forward shall be rapid, even, and unhampered. An important department, whose work is little seen outside of railway circles, is the Car Service Department, whose eye is watching night and day to see that grain cars are properly distributed and that once loaded, they move forward rapidly to the lake or ocean port from which further shipment is to take place. During the grain rush each fall the Car Service officials meet a difficult situation, for instead of an even balance of haul back and forth through the west, there's an over-

So, as the season approaches for the hum of the binders across the prairies, everything is of the company through the western region, compile a report on the loadings and movements of grain cars at the close of each day. These reports are telegraphed to Winnipeg where, with advices from the lakehead and Vancouver, they are assimilated. Hence, with one single report simply compiled, the entire

Canadian National lines in the Western region almost continually, and that every movement of these cars must be checked in order that there shall be no confusion or delay in their handling, the enormity of the work of handling the grain movement may easily be realized. And to handle over 175,000 cars of grain

Lake Carrier Loading at Terminal

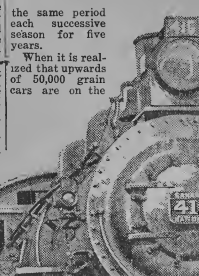

brought in to the huge repair shops and overhauled and made ready. Nor is this all. In preparation for the movement of heavy trains loaded with wheat and in order that there shall be no delay en route from the farmer's hands to the lakehead or to Vancouver, roadbed and other facilities must be in the best possible condition. Therefore during the summer months every foot of the track over which the grain must move is subject to careful inspection and improvement; ballasting is done wherever it may be required and all parts of the system are keyed up to the highest pitch in order that no hitch may occur in the movement of the crop.

Weeks before the crop itself begins to move, there is another movement under way which has an important bearing on the steady flow of grain to the markets of the world, and this is the gradual concentration of locomotives and grain cars at strategic points on the western lines, so that they will be available for rapid distribution wherever they are needed.

whelmingly large exodus from the grain fields with a proportionately small freight movement back toward the prairies. Here the Car Service Department faces the task of moving these empties back from the lake or ocean ports, to line elevators at the lowest possible cost and it is only by wise and careful scrutiny of the situation that it is possible for this work to be successfully carried out.

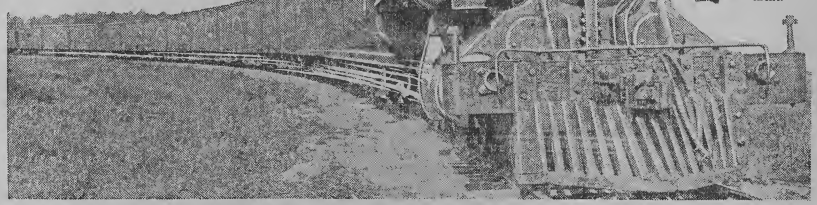

An elaborate system of tabulating the grain situation daily is operated by officials of this department. Each day through the press there appear reports on the grain movement, both by line and through the west and at the head of the lakes where ships are fast loading from terminal elevators as cars discharge their cargoes. To make this possible agents

the same period each successive season for five years. When it is realized that upwards of 50,000 grain cars are on the

Loading Wheat into Box Cars

to the two outlets, the Great Lakes and the Pacific ports, means that train loads of grain must be kept constantly on the move, both eastbound and westbound. The growing importance of the Pacific outlet is shown by the fact that Canadian National car deliveries to Vancouver during the grain year just closed, have been almost five times as great as during the season of 1922-23, and as more facilities are provided for the handling of the westbound shipments it is expected that the next few years will see enormous gains still being made year by year in this movement.

Canadian National Train of Wheat Bound for Terminal Elevators

Canada has 121 dailies and 1,066 weeklies—66 in French and 30 in 13 foreign languages.

Canada has the greatest asbestos, nickel and cobalt deposits in the world.

Canadian newsprint mills have a capacity of over 5000 tons of pulp daily.

Contract Form Of Ebgerston District Medical Board

Agreement

THIS AGREEMENT made in duplicate this Fourteenth Day of August 1924.

Witnesseth

THAT WHEREAS certain citizens of Edgerton District, a list of whose names is on file with W. T. Hays, Secretary for the parties mentioned have paid at the rate of \$15.50 per annum with the object of engaging a physician for a term of one year:

AND WHEREAS at a meeting of the aforesaid the undersigned were appointed a committee of the whole to administer the funds and engage a physician upon the terms mutually agreed on between the subscribers, the committee being as follows:— Messrs Don. Pawsey, W. T. Hays, Roy Taylor, B. C. Lees, W. Ferris, L. Guy, Herbert Spencer and Mrs. W. T. Hays.

NOW the committee mentioned individually and collectively as trustees for the general subscribers to the funds have chosen to be known as for the purpose of this agreement, the EDGERTON DISTRICT MEDICAL BOARD:

AND WHEREAS the Edgerton District Medical Board is empowered under the authority vested in them by the subscribers thereto, to employ the services of a physician on the terms and conditions as hereinafter set forth, namely:

1. That they engage a physician for the term of one year at a salary of \$120 per month per householder paid in advance monthly;
2. That in consideration of the payment of the salary mentioned the physician will give free medical services such as he can perform without additional aid, to the subscribers to the scheme. Contract to provide for medical attention and minor surgery not including mid-wifery or major surgery to all members of the party's family under twenty-one years. Members of that family living away from home or married not included under the \$15.50 contract.
3. That the livery charges shall be paid by the contract holder at each visit.
4. That the physician shall be at liberty to engage in his practice with all parties who may not be subscribers under the scheme and that in such practice he shall be permitted to charge the full fees at present in effect under the regulations of the Medical Association, or such fees as he may consider expedient, provided that his services in such capacities are not allowed to interfere with the proper fulfilment of his duties to the Edgerton DISTRICT MEDICAL BOARD and that any remuneration he may receive for services apart from that under the contract will not be considered as applied to the payment from the Board under the agreement herein.
5. That for the purpose of this agreement the subscriber will be entitled to free medical attention for himself and all dependent resident members of his family without any limitation being placed on the number of dependents provided such dependents who are physically fit are under the age of twenty-one years. Exceptions may be made to this by agreement between the Board and the physician.
6. That in the event of the physician receiving calls at the same time from subscriber under the scheme and a non-subscriber, the subscriber under the scheme to be given preference except when the other case is an emergency. Mid-wifery to take preference over all. Patients under the contract to pay \$25.00 for midwifery; failure to pay the \$25.00 charge as provided under the scheme within six months, the Medical Association charge of \$25.00 will be made. Abortion cases are not included in the scheme and charges for same will depend on the severity of the case less \$10.00 from the Medical Association scale.
7. That on being called out to see two or more patients in the contract at one time in the same direction, the livery fee to be equally shared in the paying thereof.
8. That emergency medicine as supplied at visits shall be paid for at cost price, but medicines on prescription forms to be paid for at prevailing prices.
9. That town members pay 50c per call at time of visit.

NOW THEREFORE the parties hereto do hereby promise, this agreement made between EDGERTON DISTRICT MEDICAL BOARD, hereinafter called PARTY OF THE FIRST PART, and PETER MELLING M.D. of the village of Edgerton, in the Province of Alberta, Physician, hereinafter called PARTY OF THE SECOND PART.

Witnesseth That

WHEREAS the party of the second part is a duly qualified physician, licensed to practice medicine and surgery in the Province of Alberta;

AND WHEREAS the party of the first part is desirous of employing the party of the second part in his capacity of physician and surgeon under the terms and conditions hereinbefore stated:

AND WHEREAS the party of the second part is willing to enter into an agreement with the party of the first part for the purpose aforesaid at the salary hereinbefore stated, payable monthly in advance, and said employment being subject to the conditions, covenants, provisions and stipulations herein set forth and agreed upon;

NOW THEREFORE, the parties hereto mutually covenant as follows:

1. The party of the second part covenants and agrees that he will faithfully, honestly and diligently, serve the party of the first part in the capacity of physician and surgeon to the subscribers of the scheme known as the Edgerton District Medical Board for a period of one year from the date hereof, namely 14th August, 1924, and that he will devote sufficient of his time, labour, professional skill and attention to such employment as shall be necessary under the circumstances.
2. In consideration of such services the party of the first part covenants and agrees to pay the party of the second part the salary hereinbefore stated for the year commencing on the day of the date hereof and agrees to make payment to the party of the second part as stated in the terms, namely by monthly payments paid in advance. Contracts effective on the first of each month.
4. It is provided further that this agreement may be terminated by either party hereto giving one month's notice to the other party, in writing, to that effect.

IN WITNESS WHEREOF the party of the first part, in trust for the subscribers of the scheme, has herewith, by the hand of its authorized officers placed its signature and seal, and the party of the second part has placed his hand and seal the year and day first above written.

No Foot And Mouth Disease In District: Animal Suffered From Tuberculosis

There is no foot and mouth disease among the cattle of this district. Some anxiety was experienced in this matter last week, when suspicions were aroused by symptoms shown by a cow. With commendable speed Mr. Truman Varty reported this matter to Constable Moses A.P.P. and it was referred to the provincial authorities. The provincial veterinarian made inspection and pronounced the case to be one of tuberculosis in an advanced stage. The animal was destroyed and fears of worse trouble set at rest.

"Strictly Business" Well Played At Ribstone

With a capacity audience on hand to get away to a flying start Friday evening August 22nd., the Scottish Harvesters opened the entertainment for the Ladies Aid with one of their own compositions "Way out West in Sunny Alberta" followed by Mr. T. W. Campbell in "Bonnie Jean" then Mr. McBeth danced.

The ladies Aid then produced their three act play "Strictly Business" The enthusiasm of the audience was commensurate with the size of the result that the performance went with no end of pep from beginning to end.

There are several points with this production that should be emphasized. In the first place this production is made up of local artists and many of the thespians made their first appearance one would not suspect this. Then again, the play being produced was a farce and to put on a farce requires no little skill.

It is greatly to the credit of the Ladies Aid and the Scottish Harvesters that they put on a farce so well and did so without overdo the situation.

The program by the Harvesters in addition to the opening items was as follows. Wattie McBeth in Sword Dance and Shear Trews, Dick McIntosh in "Lazy" dressed as a policeman, Georgie Swan in "Whats the matter with father", Tommy Campbell in his latest song "I'm a Hobo" while a few choruses were submitted.

The artists who took part include Mesdames L. Elson, R. Morrison, C. Clasper, A. Heasman, F. Russell, T. Young, O. Young, E. Dobson, T. Trifes, and Misses Ada Russell, Dorothy Young, Violet Young, Miss Cryderman; also Messrs T. Campbell, G. Swan, D. McIntosh, W. McBeth and B. Clasper.

AND THAT WAS WHY

"So sorry to hear that your husband has been drinking again, Mrs. Migs. Of course, drunkenness is a disease. He ought to be treated by a physician."

"Bless ye, 'e wouldn't, moid that, sir! When me 'usband's 'ad a drop, 'e don't care 'oo treats 'im."

Canad has the largest inland port in the world—Montreal.

FREE. Model C. Valt. Auto Strop razor given away. You pay not one cent for the razor simply buy a box of blades for one dollar (enough blades to shave the longest faced grouch in this community for a whole year) and we give you the razor as a present. The razor itself is jake, we have used one of the very same for the past two years and a half, have plenty face left.

Editorial Comment

Quarantine restrictions are irksome to those upon whom they are imposed. No one cares to be shut out from his fellows by the card at the doorway bearing the warning legend "Quarantine." It seems to savor too strongly of the old cry of "Unclean, Unclean!" and it is somewhat difficult to repel a sense of shame that we should, even temporarily, be cut off from our usual intercourse with our fellows.

In reality there is no shame attached to this "Quarantine" but quite the reverse. It is simply a matter of regulating our conduct for the protection of our fellow-

citizens. It is in reality a defensive measure for the good of the community. It is an effort to retard the advance of communicable disease by confining it to those already fallen the unfortunate victims to its ravages. In a military sense it is considered an honor for the attacked to hold their position, even at the highest cost, if by so doing they are successful in saving the main army from further attacks and possible defeat. So "Quarantine" should be regarded—not as a shameful thing; but as a point at which the attacking enemy is being held back from further advance.

Another false idea which we need to get under proper control is that it is a sign of weakness and inefficiency to call a doctor for consultation before the moment arrives when it becomes absolutely unavoidable and obviously essential to preservation of life itself. When we are aware of a weak spot in the harness, we strengthen it rather than risk the run-a-way or the accident, and we do not regard it a sign of weakness to do so. When we are aware of loose bolts, flaws, or other faults developing in our machinery, we, to fix it up before further trouble and expenses is involved. The human body, like the harness and machine, needs from time to time certain care and attention which if given early often prevents much greater trouble, pain and suffering. It is therefore wise to obtain the services of the doctor before the trouble becomes too complicated.

Fully recognizing the value of early identification of contagious diseases the board of health pays for bit of medical health officer called in to diagnose. This diagnosis in the case of an outbreak of communicable disease cannot be made too early, for delay is most often responsible for a great increase in the number of individuals attacked by the epidemic. Failure, therefore, to summons doctor's aid is no sign of individual weakness but rather it is a crime against the community.

The local authorities, for the same reason, should not fail to take necessary legal action against those who, knowingly or carelessly, fail to comply with the regulations that have been drawn up in these matters. Lack of knowledge cannot be accepted as a mitigation of the offense in these days of education when the vast majority can read. The only justifiable course for those who lack knowledge in these matters is to seek such information which is of distinct advantage to all, and not to willfully continue ignorant and by doing so inflict suffering upon others.

Whilst on this subject, we will thank by the citizens of the McCafferty district. They have organized a District Medical Board,

drawing up a contract form with the local doctor for necessary for necessary medical services on a club rate basis of payment. The essence of the contract provided the doctor with a staple income and the contracting parties with medical treatment for themselves and dependent members of the family below twenty-one years of age.

The principle of such contract is sound to the core and is far more rational than the haphazard method we have been accustomed to, which make sickness a sort of commercial commodity and its healing a matter that which should in some measure be purchasable. We are indebted to the strict code of ethics by which the medical profession has governed itself for protection from a gross form of commercialism in this matter. The McCafferty form of contract provides the medical man with a more constant source of income and removes the extra heavy burden of cost to those who suffer sickness.

We have read that in parts of China it is the custom only to pay the doctor during the period in which one is in good health, the doctor's pay ceasing whilst the individual is sick. Such a system, it appears to ourselves, is preferable to the present one we follow, or to the McCafferty system, but meanwhile it may prove that McCafferty is taking a step in the right direction.

If you speak evil of a man in his absence it is cowardly, and if in his presence it is dangerous.

Leading a woman to the altar is often a man's last act of leadership.

THE NEWSPAPER

There is no greater responsibility than that resting upon the editor of a newspaper. The late Doctor Talmadge said: "The newspaper is the great educator of the nineteenth century. There is no force compared with it. It is book, pulpit, platform, forum all in one. And there is not an interest—religious, literary, commercial, scientific, agricultural or mechanical—that is not within its grasp. All our churches, and schools, and colleges, and asylums, and art galleries feel the quaking of the printing press."

Every man who has anything to do with the making of a newspaper should take pride in giving it a character for truth and wisdom. "I saw it in the newspaper" ought to be sufficient evidence of the truth of an assertion.

But newspapers are human institutions, and are good or bad in precise proportion to the character of their makers. Some are avaricious and look at all questions through the business office. Some are timid and sycophantic, and some are weak and foolish. To put them all in a class would be as unjust as to put all men in the same class.

The world would be a stupid place to live in if it were not for the newspapers, and it would also be a much more cruel and tyrannical world. Besides being a terror to evil doers, the newspaper inspires heroism, patriotism, philanthropy, and integrity. When the newspaper becomes a traitor to its trust, and the people lose faith in its sincerity, God help the republic!—The McClure (Pa) Plain Dealer.

The End of the Trail

I must travel the miles till the journey is done,

Whatever the turn of the way.

I shall bring up at last with the set of the sun,

And shall rest at the close of the day.

Let me deal, as I journey, with foe and friend

In a way that no man can assail,

And find nothing but peace at the roadway's last bend,

When I come to the end of the trail.

We are brothers who travel a great, common road,

And the journey is easy for none.

We must succor the weary, and lift on the load

Of the pilgrim whose courage is done.

Let me deal with them each on my way to the West

With a mercy that never shall fail,

And lie down to my dreams with a conscience at rest

When I come to the end of the trail.

—Clarence E. Flynn

RURAL MUNICIPALITY OF MANITOU LAKE, No. 442

Public Health Warning

The Council of the Rural Municipality of Manitou Lake, No. 442 have given the Secretary instructions to proceed with the prosecution of any person breaking the regulations of the Public Health Act of the Province of Saskatchewan.

The non-reporting of communicable disease and the breaking of quarantine will be severely dealt with and be prosecuted for the first offence.

A health card and the regulations are being sent to every ratepayer who is resident in the Rural Municipality in the near future and there will then be no reason for a lack of knowledge of what should be done.

J. BRADLEY, Secretary

McCafferty U.F. Organize New Health Pool Scheme For District

The McCafferty U. F. A. have organized what might be termed an health pool. Their organization is called the Edgerton District Medical Board and enrolment in the scheme is voluntary but each subscriber is required to enter into a contract, which binds the subscriber and the doctor under a form of agreement.

The main terms of this agreement provide that for a payment of \$1.25 per month to the doctor medical attention is provided by the contracting doctor to the subscriber and members of his family resident at home who are dependents under the age of twenty-one years. The medical service includes minor surgery but does not provide for major surgery, or for attention beyond

the ordinary care of the doctor in his regular practise. Subscribers to the scheme are given advantage of a charge \$10 dollars below the fees authorized by the Medical Association for mid-wifery and abortion cases. The doctor is entitled to payment at time of visit of livery charges, but where two patients are visited at the same trip the livery charge is pooled, each patient paying half. When doctor receives a call for a subscriber and non-subscriber at the same time, he is to attend the subscriber first, unless the other case is one of urgency.

For further information, our readers should refer to a copy of the contract which appears in another portion of this issue.

Here and There

A remarkable report comes from Brockville, Ont. Harry Church, a farmer residing five miles north of that town, is the owner of a Holstein cow calves has just given birth to three calves. All are alive and thriving.

On July 11, Her Majesty the Queen of Spain and her two daughters visited the Canadian Pacific Railway's pavilion at the British Empire Exhibition. Her Majesty evinced deep interest in all she saw and declared the exhibit to be "perfectly lovely."

Although the present season of ocean travel has reached the period usually associated with a falling off in the number of passengers, steamship companies report that little decrease is apparent this year and that the total volume of passenger traffic in 1924 will probably be the largest of any year since the war.

World production of silver for the first half of 1924 is 117,650,000 ounces, as against 118,250,000 ounces in the first six months of 1923. Canada accounted for a production of 10,800,000 ounces in 1924, as against 10,500,000 ounces in the first half of 1923, being the third producer after Mexico and the United States, both of which showed a decline.

Saskatchewan's output of creamery butter in June amounted to 1,787,056 pounds, as compared with 1,746,000 pounds in June, 1923, an increase of 41,056 pounds or 2.4 per cent. From January to June, 1924, the province has produced 5,109,000 pounds of butter, as against 4,223,016 pounds in the same period in 1923, an increase of 886,074 pounds, or 15.3 per cent.

Among the tributes to the late Sir Edmund Osler, of the Canadian Pacific Railway's directorate, was one from C. R. Hosmer, for many years a fellow-director. It was addressed to Vice-President Grant Hall and read as follows: "He was the last living of the great men who organized our great railway."

The late Sir Edmund became a director of the Canadian Pacific Railway in 1885, the year of the completion of the transcontinental line.

A most interesting and attractive volume entitled "Here and There in Montreal" has just been published by the Munson Book Co. of Toronto. The book is well illustrated with maps and pictures in color and brings out many noteworthy facts, such as that the city's total population is 900,000, that two-thirds of this number are French-Canadians and that Montreal is the second port of importance in North America. The author is Charles W. Stokes, Asst. Gen. Publicity Agent of the Canadian Pacific Railway.

The first annual Pow Wow of the Trail Riders of the Canadian Rockies, held at Yoho Camp, was a great success. Over 200 internationally known writers, artists, etc., rode in to gather round the sacred fire in the Sun Dance Lodge. Charles D. Walcott, secretary of the Smithsonian Institute of Washington, D.C., honorary president of the Trail Riders, addressed the gathering, a poem written specially for the occasion by Bliss Carman was read and Chiefs Walk-in-the-Road and Buffalo Child Long Lance performed an Indian dance.

Avoid disappointment. Tell Saker your fresh fruit requirements now.

A: "Hallo, Bill, that's a nice overcoat. Where did you get it?"

"At Snook's"
"Tailor or restaurant?"

Several Cases Of Infantile Paralysis Develop; Strange Features Of The Epidemic Puzzle Medical Scientists

An epidemic of infantile paralysis is prevalent in this district. Cases having already appeared amongst the children of the following families: Mr. and Mrs. O. Z. St. Pierre; Mr. and Mrs. Joseph Furlotte; Mr. and Mrs. Alex. Taylor; Mr. and Mrs. Robert McMuskey; Mr. and Mrs. Alex. Johnson and Mr. and Mrs. Tom Young. Each of these cases show active paralysis either of the arms or legs.

Infantile paralysis is a disease which still baffles medical science and the highest authorities are earnestly seeking more definite information. It is known to be caused by a germ, but no means have yet been discovered by which to diagnose the case until paralysis actually sets in.

Most cases of infantile paralysis a few days after the onset develop symptoms of paralysis, but this is not always the case as many of the cases, both mild attacks or more severe, are not followed by paralysis.

It should be borne in mind that every case of infantile paralysis, however mild, is infectious and therefore a potent source of further spread of the disease.

Dr. V. E. Barrow of the Department of Public Health of Alberta arrived in Chauvin by Tuesday's noon train and is, at the time of writing investigating the cases which have developed in this district.

The attention of every parent and guardian is called to the fact that the law requires that every suspected case be reported without delay to the secretary of the municipality or to the medical officer.

The reason for this is that only by early and efficient quarantine can the further progress of the disease be stayed. The local board of health pays for the visit of the medical officer to diagnose the case. Failure to report infectious disease, no matter how mild the individual case may be renders the parent or guardian liable to a fine of \$50.

Mr. M. M. Cook and Mr. Morley, general manager of the U.G.G. paid their annual visit of inspection to the local elevator yesterday.

It is cheaper to get your fruit at Sakers. Order it now and avoid disappointment.

"Is that all the ice I get for ten cents?" she demanded.

"Don't worry, lady," he replied as patiently as possible. "Some day you might be in a place where you couldn't buy this piece for a million dollars."

Glorious Hair—

In 90 Days or Money Back

Women who wish to stimulate the growth of their hair should use Van Ees Liquid Scalp Lotion. A glorious head of strong vigorous hair surely follows its consistent use, and consistent use is easy because Van Ees comes fitted with a patent rubber applicator that feeds the medicament directly to the roots of the hair, eliminating many manœuvres with the fingers. And the flexible tips of the applicator bring a healthy stream of blood to feed the hair roots. Buy your Van Ees 90-day treatment plan. Money back if it fails.

Exam Results

Chauvin and district pupils who passed in the recent departmental examinations are:

GRADE XI

Delbert Young.

GRADE X

Heather Richardson; Earl Fahnner. (Butzeville).

GRADE IX

Lloyd Reynolds

GRADE VIII

Lillian Cahill; Ivy McCrea; Thelma Ryall (Prosperity); Lily Harrie (Prosperity) Ernest Pitman.

Wainwright Grits Select Officers

A well attended meeting of the Liberals of the Wainwright constituency was held at Wainwright on Friday, August 22nd when an interesting address was given by Hon. C. R. Mitchell, J. Dechene, M.L.A., was unable to be present.

An organization meeting followed at which J. A. MacKenzie of Chauvin was elected president, Dr. Wallace of Wainwright vice-president, while W. J. Huntingford fills the position of Secretary.

The first Ontario wheat of the 1924 crop was sold on Woodstock market at \$1.25 a bushel.

New dance steps are being devised for the winter by dancing masters. Are they needed?

A profit of \$4,305,629 on liquor sales, fines, tax on beer, etc., was realized by the province of Quebec in the fiscal year just ended.

Eamon de Valera, the Irish Republican leader, recently released from prison, has reiterated his former policy of independence. Judging from his fiery speech in County Clare, prison has not moderated him.

France has evacuated Genoubo and Appenwey, Baden, Germany. Silence on both sides attended the departure of troops, but immediately afterwards German Republican flags were flying from almost every house-top.

Dont Look For City Employment This Winter: Prospects Not Good

Doubtless many of the young men who came to Canada this year from Great Britain and Europe to take up Agriculture work will be tempted to leave their farm employment this fall and seek employment elsewhere. They will probably find their way to large centres in expectation of picking up work. We would suggest that every man who has a job in Western Canada today should stick to it, or secure an engagement with some other farmer in the district where he is now located at the present moment. There is nothing in sight that would indicate that there will be any demand for labor that the usual local supply will not be able to fill; consequently farm hands to throw up burthens on the chance of getting

some other work are very likely to be disappointed, and will spend what money they have saved this summer in running place to place seeking jobs. In view of this possibility, they will be well advised to endeavor to arrange with their present employers or some other farmer in the neighborhood for the winter months; thus, they will be able to add to their summer's savings and gain further valuable experience. Not a few farmers have engaged their help for the year, and with the increase in mixed farming everywhere, this practice is becoming more common than it was formerly. Wages and other things being right, it is said the farmers are finding such an arrangement advantageous.

THIS WEEK'S WORLD NEWS TOLD IN SHORT PARAGRAPHS

An initial payment on basis of No. 1. Northern at Fort William of \$1.00 per bushel has been agreed upon by the conference of Alberta, Saskatchewan and Manitoba pools held at Regina last week.

\$2,000 worth of cocaine and morphine has been captured from drug peddlers last week at Raymond, Alberta.

An Alabamaca hotel keeper has been fined for admitting boys into the bar room.

Twelve prizes were won at Victoria B.C., by Shorthorn cattle belonging to the Alberta ranch of the Prince of Wales.

The U. S. world aviators have arrived in Greenland.

Puzzling signals have been picked up by Pacific coast fans. The idea of these being messages from Mars is not seriously held.

A number of storms of unusual violence have occurred in different parts of the Canadian west during the past week. Much damage being done to electrical and telegraph services.

The value of the Canadian dollar has again reached par on the New York exchange. It is predicted that the Canadian dollar may shortly be at premium.

During the first four months of the present fiscal year Canada has decreased her imports for home consumption by over forty million dollars, whilst exporting an increased amount of over twenty million dollars.

The death rate in Great Britain in 1923 is the lowest ever recorded, being 11.6 per 1,000. Infant mortality establishes a similar record, being 69 per 1,000. Births, however, were 22,000 below those of 1922. Small pox is on the increase.

The announcement that the B. P. oil well at Wainwright was a producer of 500 barrels per day is stated to have been premature.

The production of Alberta fisheries during 1923 was nearly a half a million dollars.

According to the Labor Gazette the cost of living has declined somewhat being now \$9.90 as against \$10.17 at this time last year.

An experimental shipment of thirty pounds of Canadian cher has arrived safely in London, England, a journey of over 5,000 miles.

The five new cruisers shortly to be laid down by the British Naval Office will be large and have marine engines more powerful than any yet afloat.

The firm attitude of the British Government has cooled the Egyptian insurgent elements which caused a disturbance at Athara and Khartoum.

MORTGAGE SALE OF FARM PROPERTY

There will be offered for sale by Public Auction at Reynold's Barn Chauvin, Alberta, at 2 p.m., on

Saturday, 20th September 1924

S. W. Qtr. Sec. 20; Tp. 41; Rge 1 W. 4th M. 160 acres, more or less reserving Mines and Minerals.

TERMS: 10 per cent cash at time of sale, and the balance according to conditions to be made known at the time of sale or upon application to the Vendor's solicitors. The sale is subject to a sealed reserve bid and free from all encumbrances, except taxes for the current year.
